

OCTAVIAN LAB SOLUTIONS INTEGRATIONS

**International
partners**

**Customizable
offer**

**Always
up-to-date**

 **Integration solution**

Octavian Lab specializes in the creation of customized solutions for integrations management. Our aggregator integrates the best international third-party casino and gaming providers directly either on the Licensee's platform or on Octavian Lab's Accounting Gaming Platform, through one single software integration.

 **Customizable offer**

The Licensee can either use their business contacts on our platform or select games and suppliers from our list of international partners or request an *ad hoc* selection of integrations to create their customized offer of products and services.

 **Always up-to-date**

Our team is continuously at work on the development of the aggregator and keeps it always up-to-date, also by periodically adding new suppliers, to enrich the Licensee's commercial offer without additional integration efforts.

 **International partners**
