

# OCTAVIAN LAB SOLUTIONS PAYMENTS

**Seamless  
wallet transfer**

**Multi  
currency**

**Customizable  
offer**

## Payment solution

Octavian Lab's team specializes in the development of customized solutions for the management of e-payments on online-gaming websites.

We provide the Licensee with major international payment providers interfaced through last generation APIs in an elegant, simple, and modern solution.

## Customizable offer

Through our aggregator, we integrate a selection of international payment gateways either directly on the Licensee's platform, or on Octavian Lab's Accounting Gaming Platform through one single software integration.

The Licensee can select the payment gateways of their choice from our list of international payment gateways or request a personalized selection of integrations to create their customized offer.

## Always up-to-date

Our team is continuously at work on the development of the aggregator and keeps it always up-to-date, enriching the Licensee's offer without additional integration efforts.

## Multi currency

Octavian Lab's payment method aggregator is multi-currency so the Licensee may use it globally and in multiple currencies at the same time.
