Protocol solution

Octavian Lab's team specializes in the creation of simplified solutions for the management of communication protocols.

Since 2007 we develop communication protocols for the Italian online betting and gaming market.

With more than a decade of experience, we offer our PAAS - *Protocol as a Service* solutions for all communication protocols on the international regulated markets.

Communication protocols

We provide the Licensee with the most cutting-edge software, interfaced using last generation APIs, for the simplified management of all the communication solutions necessary under the specific regulation of the sector.

PSQF | Communication protocol for fixed-odds betting

PGDA | Communication protocol for distance skill games

PGAD | Communication protocol for the gambling
PACG | accounts register

PBAD | Communication protocol for remote bingo

Regulated markets

Octavian Lab's team is presently developing communication solutions for the international regulated markets of Italy, Spain, the United Kingdom, Malta, and Colombia.
